

FORENSIC ACCOUNTANTS WHO **PRIORITIZE** **COMMUNICATION** AT EVERY STEP

At Pario Forensic Accounting, we know that the best analysis in the world doesn't matter if it isn't communicated clearly and effectively. Our team is built around a key defining principle: **effective communication** that keeps everyone informed, involved, and confident throughout the process. Our experts are as skilled at explaining as they are at analyzing.

Our Communication-Based Approach

1. Listen First

We begin every engagement by understanding the insured's operations, the nature of the loss, and what each stakeholder needs to move forward.

2. Tailored Information Requests

We ask for what's relevant and explain why to minimize confusion and ensure meaningful progress.

3. Clear, Real-Time Updates

Our team maintains proactive contact, so our clients and their clients are not left wondering where things stand.

4. Deliver Results That Speak for Themselves

We present findings in a way that's actionable and easy to understand, both for adjusters and insureds.

What You Can Count On

For Adjusters:

- Regular updates that reduce your need to follow up on status
- A partner that engages directly with insureds to manage expectations
- Collaborative approach that invites you into the decision making
- Insightful analysis delivered on time and explained thoroughly
- Availability for discussions throughout all phases of the claim process

For the Insured:

- Communication tailored to the business owner's level of financial fluency
- Ongoing explanations of both processes and findings to foster trust
- Return calls, follow ups, and availability for questions throughout the claim
- Flexibility in balancing data limitations with accurate loss conclusions
- Confidence that they are heard, understood, and supported

LET'S TALK. AND KEEP TALKING.

From the first call to final resolution, we work directly with both sides to deliver the clarity and confidence needed to move claims forward.
